

Routine Maintenance Services

Mowing services are scheduled year round to ensure the appearance of the property is kept looking great and healthy. Weekly services during the prime growing season are essential to maintaining a healthy length and prevent weed growth. To maintain our high standards we schedule services weekly April through September. Bi-weekly during March, October and November and once per month from December through February.

Lawn services include

- Mowing
- Trimming and edging around the property
- Blowing off paved areas and walkways
- Weed control in bed areas (sprayed and/or pulled); additional fees may apply

Routine Maintenance Services

Have your yard looking its best year round by pruning and removing dead growth from shrubs and plants. We will remove sticks, leaves, weeds and other debris from bed areas to keep them looking fresh! Install seasonal annuals to add an extra pop of color!

Our Promise for Quality

If you are looking for a reliable, professional, and affordable weekly lawn care service, look no further! We have a friendly and knowledgeable staff, with years of experience, ready to take care of all your lawn service needs.

We realize that each lawn is unique and that's why we offer customized lawn maintenance programs tailored to your lawn's specific needs. Anyone can claim they know how to mow lawns. We back it up with skilled technicians that are knowledgeable in all types of lawn services.

Lawn Care Services and Packages

Mulch Installation

Fresh mulch will have your property looking brand new! We offer high quality mulch and install it at a depth of 3" with packed edges to help keep it looking fresh throughout the year.

Aeration and Seeding

This service is essential to maintaining a beautiful lawn and ensuring your lawn is absorbing all of the key nutrients it needs to stay looking healthy! Removal of soil plugs from your lawn improves root growth, reduces thatch, and reduces soil compaction. We offer this service during the Fall season for the best germination rate success. See our custom application programs that complement and ensure you have the best looking lawn in your neighborhood!

Leaf Removal

We provide thorough leaf clean-up and removal services for the entire property (beds and lawn area).

Say Goodbye to Weeds

1. Early Spring Application

- Fertilizer
- Pre-emergent

- Fertilizer
- Pre-emergent
- Iron Plus
- Weed Control

3. Early Summer Application

- Fertilizer
- Weed Control
- Weed Control Enhancer
- Soil Additive: Fungicide Preventative

4. Summer Application

- Fertilizer
- Weed Control
- Weed Control Enhancer

5. Fall

- Fertilizer
- Weed Control
- Weed Control Enhancer

6. Winter

- Fertilizer
- Iron Plus
- Weed Control
- Soil Additive: Lime

Application Elements

- **Fertilizer:** Greens up the yard and promotes healthy grass. Professional blend customized for each season.
- **Pre-emergent:** Attacks un-germinated weed seeds and keeps them from germinating for less weeds during the growing season.
- **Iron:** Adds nutrients to the soil to green up the grass and promote healthy grass going into the spring season.
- **Weed Control:** Kills germinated weeds that are currently in the yard (even young weeds that are not visible).
- **Weed Control Enhancer:** Allows weed control to penetrate the soil and work more effectively.
- **Fungicide Preventative:** Applied during early summer months will reduce the risk of a fungus due to high humidity, excess rain and overwatering from sprinklers.
